Consolidated capital ratios

Hang Seng Bank Limited

The following tables show the capital base, risk-weighted assets and capital ratios as contained in the 'Capital Adequacy Ratio' return required to be submitted to the Hong Kong Monetary Authority ('HKMA') by the Bank on a consolidated basis that is specified by the HKMA under the requirements of section 3C (1) of the Banking (Capital) Rules.

The Group uses the advanced internal ratings-based ('IRB') approach to calculate its credit risk for the majority of its non-securitisation exposures. For counterparty credit risk, the Group uses the standardised (counterparty credit risk) approach to calculate its default risk exposures for derivatives. For market risk, the Group uses an internal models approach to calculate its general market risk for the risk categories of interest rate and foreign exchange (including gold) exposures and the standardised (market risk) approach for calculating other market risk positions. For operational risk, the Group uses the standardised (operational risk) approach to calculate its operational risk.

The following table sets out the composition of the Group's capital base under Basel III at 30 June 2022 and 31 December 2021.
