

What can we do for ESG

Welcome to ESG Bus!

Bus Stop 6: What can we do for ESG

ESG matters can seem very distant from our work and there's little we can do to make changes

In fact, your support is essential to help create a more sustainable world!

So where can we have influence to support the company driving ESG?

For example...

Environmental

Engage customers to seek opportunities to promote green financing

What about investment choices?

Offer Green and ESG investment funds and bonds to our retail and private banking customers

Social

Use local suppliers to demonstrate our support for the community

Ensure our contractors and suppliers adhere to our ESG standards

Safeguard the privacy of our customers' personal information and other data

Governance

Voice concerns when seeing a wrong behavior

Assess whether clients meet our sustainability standard before we commit to corporate lending

Every little helps

It's possible to bring a positive impact to the planet and society!

Please stay tuned...

Bus Stop 7: Our Achievements in 2020

Hang Seng aspires to become a leading entity to drive ESG in the banking industry
